

STAYCLEAN™

LEATHER ANTI-SOILING SYSTEM

A unique aqueous anti-soiling system ideally suited for both leather and vinyl in automotive, furniture, aircraft, marine and garment application. Maintains the original feel of the leather or vinyl, has superb UV protection and a natural look. Protects from soiling, staining and dye transfer.

For more information visit: leatherfinishingproducts.com.au

ANTI-SOILING SYSTEM

In recent years, designers and manufacturers have increasingly selected leathers in light colours such as whites, beiges and lighter earthy tones. These leathers are of high concern to all in the leather industry from the manufacturer to the consumer because of the tendency of these leathers to soiling.

Denim transfer, dye transfer (from scatter cushions to tracksuit pants), ink marks, general spillages, dust and dirt are a challenge to keep the leather looking and feeling great for years.

Stahl's **STAYCLEAN** is a solution to anti-soiling and leather care.

LEATHER PROTECTION ADVICE & APPLICATION

Protect your leather as soon as possible. Use our mild **STAYCLEAN** Cleaner and then apply by hand one coat of **STAYCLEAN** Protector. Every 3 to 6 months reapply **STAYCLEAN** protector, always clean before applying protector.

YOUR BENEFITS AT A GLANCE

Significantly reduced tendency for soiling • Easy removal of dirt that is accumulating over time
Easy reapplication • 1300 hotline for advice or technical questions

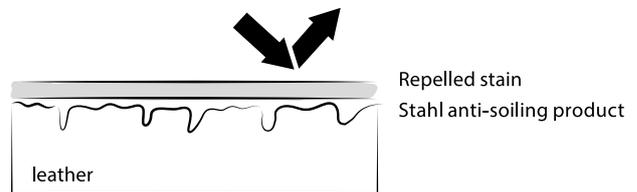

STAY COLOURFUL STAY CLEAN

LEATHER CARE

Contrary to popular belief, leather is not self maintaining. Whilst it is low maintenance, **it certainly isn't no maintenance**. A simple regular maintenance program will keep your leather looking and feeling like it did on the day you purchased it.

Over time, body oils, sweat and acids that naturally come into contact with your leather through general use will cause cracking, de-lamination and discolouration without proper cleaning and protection. You will see this clearly in areas of high traffic use, such as steering wheels, arm rests, seat cushions etc.

Protecting your leather using **STAYCLEAN** which creates an invisible breathable barrier will enhance stain resistance and cleanability. Depending on the level of use, this should be done every 3 – 6 months.

LEATHER PROTECTION ADVICE

Protect your leather as soon as possible. This is especially true for lighter colours and leather with high traffic.

Maintain your leather every 3 months for maximum protection. Use our mild cleaner and then re-apply your anti-soiling protection.

Keep your leather away from heat sources or direct sunlight, as this will cause premature dryness and fading.

Do not use household cleaners or home remedies, as they can cause irreparable damage to the leather's topcoat.

If you find your leather has stained, do not attempt to remove it yourself. Call a professional leather technician or visit leatherfinishingproducts.com.au for guidance.
